

IPTV SYSTEMS

IPTV CONTENT DELIVERY – HOW YOU WANT, WHERE YOU WANT

With our end-to-end IPTV solutions you can capture TV and video content directly from any source and manage its delivery to the audiences you want, via any connected device through your existing network.

Live TV streams can be taken from a wide range of sources, including terrestrial, satellite, IP or cable, and your own internal channels. We can then make them available over your organisation's LAN, wireless network, WAN, the internet and mobile devices.

We can deliver even the most complex ProAV IPTV Content Delivery System for any environment, including corporates, finance, education, hospitality, stadiums and healthcare.

THE EXPERIENCE TO DELIVER THE RIGHT IPTV SOLUTION

As an early adopter of immersive IPTV solutions, we have a proven track record across many sectors. You'll find our Networked AV solutions in many 5 star hotels, casinos, schools and Government agencies.

A QUALITY PARTNERSHIP TO DELIVER OUTSTANDING RESULTS

We understand what it takes to deliver timely, impactful IPTV communications that engage and inform staff, visitors and customers.

At KODUM, we work closely with EXTERITY, the market-leading provider of IP Video, Guest Experience and Digital Signage technology to tailor the IPTV solution that's right for you.
