

PAGING AND EMERGENCY SYSTEMS

GETTING THE MESSAGE OUT WHEN IT COUNTS

When you need to broadcast an important message or inform people of an emergency and tell them what to do, it's vital that you have a simple, easy-to-use, yet reliable system platform. At KODUM, we'll create a system around these core functions and tailor it to suit the environment, whether it be for small venues, large facilities or campus paging.

PAGING AND EMERGENCY SYSTEMS YOU CAN RELY ON

KODUM's paging solutions utilise the latest in digital networked technology from industry leaders. From paging stations to servers to speakers, we ensure the entire system is robust, compliant and works as it should when you need it.

Our comprehensive audio design process is the key to a successful paging system. We understand spaces. We understand the ambient noise that needs to be overcome, the intelligibility and the tuning that's needed to ensure every announcement is delivered clearly.

QUALITY PARTNERSHIPS DELIVER OUTSTANDING RESULTS

We work closely with leading manufacturers to develop Paging and Emergency systems that achieve outstanding results in even the most challenging environments, and exceed Building Warrant of Fitness (BWOF).
